

# Kraken workshop

Wrap up

Ville Valtavirta

24/05/2022 VTT – beyond the obvious

# Final notes

Included in this workshop:

- VTT's motivation for Kraken development.
- Solvers in the Kraken framework.
- Licensing and distribution.
- Some examples of stationary and burnup calculations for LWR SMR.

Not included in this workshop, but already happening:

- Transient analyses with Kraken.
- Kraken and advanced reactors.

Kraken is a living thing.

- Next workshop will likely focus less on motivations and backgrounds and more on recent results/updates. Maybe even hands on tutorials.
